#### **DETAILED ACTION**

1) Acknowledgement is Amendment received 1/7/2005. Applicants cancel claims 70-80, 82, 84-99, and offer new claims 100-130, for consideration.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

#### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2) Claims 124-130, are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Mackey (4,986,882). Mackey discloses a highly absorbent tissue made by wet-laying fibrous pulps comprising particular polycarbonate polymer-modified fibrous pulps such as mildly hydrolyzed methyl acrylate-grafted softwood kraft pulps (Abstract). The

Application/Control Number: 09/643,979

Art Unit: 1731

polymer-modified fibrous pulps designated as type A pulps, are highly absorbent materials (col. 8, lines 14-15), and are added during the wet stage in amount of 1% to about 20% by weight (col. 6, lines 1-15). The swelling capacity of the type A pulps is at least 20 grams of aqueous fluid per gram of pulp (col. 16, lines 20-35). The total swelling capacity of tissue product is up to 4 fold (col. 14, lines 60-62), which reads on 400 grams per gram of absorbent material. The tissue web formed is dried by through—air-drying (col. 5, lines 25-49, col. 26, lines 39-61). The tissue formed, as disclosed in Examples 1-3 (Tables, cols. 27-28), is of basis weight less than 100 grams per square meter.

In the event any differences can be shown for the product of the product-by-process claims 124-130, as opposed to the product taught by the reference Mackey, such differences would have been obvious to one of ordinary skill in the art as a routine modification of the product in the absence of a showing of unexpected results; see also *In re Thorpe*, 227 USPQ 964 (Fed. Cir. 1985).

### Allowable Subject Matter

3) Claims 100-123, are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The primary reason for indicating allowable subject matter is that the cited prior art does not disclose:

a method of making a tissue that includes the step of forming a paper web from a cellulosic fibrous material and a pre-swollen superabsorbent material in

the weight percent amount and total swelling capacity claimed, and wherein the tissue formed has a basis weight claimed (claims 100, 118).

## Response to Amendment

- 4) Claims 70-71, 75-80, 82, 84-87, rejection under 35 U.S.C. 102(b) as being anticipated by Mackey (4,986,882), is withdrawn in view of cancelled claims.
- 5) Claims 72-74, 88-99, allowable subject is withdrawn in view of cancelled claims and further review of art in prior art.
- 6) Applicants arguments with respect to claims 70-80, 82, 84-87, have been considered but are moot in view of cancelled claims.

#### Conclusion

7) Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will

Art Unit: 1731

the statutory period for reply expire later than SIX MONTHS from the date of this final action.
